

## Request of medical records

The records will be sent by mail to the address where you are nationally registered and that is connected to your date of birth (personnummer). Some details in the request are obligatory, such as name, date of birth and address, if possible details about clinic and period of your stay in the hospital. If you lack a Swedish personal number please notice that you probably received a reserve number at your visit. Reserve number always starts with 99 and then the current year and after that 6 digitals ex 99 2020-\*\*\*\*\*.
